Add together the numbers

5, 4, 3, 2, 1

What is the total?
Can you find a quick way to do this?

Find as many ways as you can of adding 3 even numbers together to make a total of 14.

12 4 8 6 10 2

You can use a number more than once.

How many different ways can you make 14?

$$3 + 11 = 14$$
$$16 - 2 = 14$$
